

Consolidated Invoicing

The Need

Larger customers placing multiple orders is good for business, but it can consume your time and resources. In order for a distribution operation to be successful, it is important to minimize cost while continuing to provide the highest level of customer service.

The Solution

Consolidated Invoicing can significantly reduce administrative overheads and simplify financial ledgers by providing the ability to combine many deliveries into a single invoice.

Key Features

- Customer options

Each customer can be given their own consolidation profile. This allows the user to specify how deliveries may be consolidated e.g. by debtor, by ship to address, at order level, or by date range. Customers can also receive the resulting invoices in detailed or summary form.

- Automated invoicing routines

Consolidation and invoicing can be launched as a single routine, on a regular basis, without the need to go into individual customer accounts or batches.

- Audit and drill down

Many delivery documents can be merged into a single invoice while retaining complete drill down links to originating deliveries and orders.

Key Features cont'd...

- Invoice documents

Customers can receive the resulting invoices in detailed or summary form to meet their individual requirements.

- Document numbering

Consolidated invoicing allows for the introduction of a separate 'shipment' document number if required, with the invoice number only issued at the point of posting, ensuring an unbroken sequential invoice number series.

- Consolidate by customer reference

Facility to consolidate by customer reference, typically where customers are ordering in relation to one or more pre-set contracts. This will enable invoicing by contract per regular time period.

What It Means For You

- Win more key accounts

Large corporate accounts typically demand consolidated invoicing from their vendors. Being able to provide this option can make the difference between winning and losing a major account.

- Save time and reduce paperwork

Many distribution customers may place orders and receive goods daily but only pay on monthly statement. The opportunity to provide a single consolidated invoice on a weekly or even monthly basis can substantially reduce handling costs.

- Simplify accounts

High volume businesses can radically reduce the number of posted transactions in their receivables ledger. This means less general ledger transactions, simpler statements, faster cash posting, and most important of all, happier customers.

Dynamistics transforms your "I wish we could" into "I know we can" with innovative solutions to provide relief from common business software frustrations—helping you to run your business more effectively and get paid faster. Our applications are used by businesses across a wide variety of industries to extend the useful lifetime of their software investment while improving staff productivity and filling the gaps in collections, delivery, trade promotion and distribution software processes.

Dynamistics makes it easy to integrate with Microsoft Dynamics GP, Microsoft Dynamics AX, and Microsoft Dynamics NAV, as well as other leading ERP systems. Whether your frustrations result from software shortcomings in purchasing, inventory management, or accounts receivable—we offer solutions that complete the processes and bridge the gaps.

Trinity from Dynamistics, Inc. is a collection of advanced distribution features that work hand in hand with Microsoft Dynamics® GP to enhance every aspect of your supply chain process. Simply put, Trinity turns the basic Dynamics GP inventory modules into a full-featured distribution powerhouse.

Running a successful distribution business requires more than just inventory management. That's why Trinity was designed to improve every aspect of your distribution operation from Sales, Pricing, and Customer Service to Purchasing & Replenishment, Inventory Control, and Delivery Logistics. Adding Trinity to Dynamics GP makes your business *more effective, efficient, competitive and profitable.*
