

A unified experience that harmonizes payroll throughout the entire employee life cycle.

Since 2002, Greenshades Software has been the trusted source for payroll tax filing, year-end forms, employee self-service, ACA management, and other tools designed to take the hassle out of payroll. Now, Greenshades Software's efficiency and compliance products are available in an all-in-one payroll solution.

SAVE TIME ON TRADITIONALLY TEDIOUS PROCESSES

Greenshades Software's wizard-driven setup and processing not only takes out the guesswork but also eliminates the need for redundant actions or double entry. Data flows with ease across modules. As a result, clients save time and resources.

EMPLOYEE FIRST: ACCESS ANYWHERE, ANYTIME, AT A GLANCE

The Payroll & HR platform empowers employees and offers easy access to pay history, benefits information, W-2's, and so much more.

Employees can:

- request time off
- submit address changes
- change withholding allowances
- make other requests that would normally be managed on paper

All the information workers need is available at their fingertips. At Greenshades, we believe in putting the employee first, and our platform makes it happen.

COORDINATE EFFORTS INTO A SINGLE ALL-IN-ONE SOLUTION

By creating an all-in-one solution for HR and Payroll functions, Greenshades Software has taken previously scattered processes and information and unified them into a single, easy-to-use, fully integrated platform.

EMPLOYERS CREATE THE EXPERIENCE

The Payroll & HR platform that fits your specific business needs, featuring custom workflows and the tools to suit every employee and department. Regardless of the ERP, the Greenshades platform is compatible.

The Greenshades team prepped the product well enough that an experienced payroll processor person could learn the product and implement it pretty quickly, and that was very important! We were ready within 7 weeks to run the first payroll of the year. - Judy Thomas

President, The TM Group

EMPOWER YOUR TEAM

Enhancements

The Greenshades team consistently updates and enhances the platform based on user feedback and industry trends to ensure it always performs at its best. Recent new features include:

- Applicant Tracking System integration with JazzHR
- Learning Management System integration with LearnUpon
- Additional medical expense coverage in the event of an unexpected incident in partnership with Paytient
- Reporting enhancements including recurring and scheduled data exports
- Timesheet enhancements, including automatic lunch entry and premium overtime calculation support
- Financial Wellness Tools including a zero-fee bank account and debit card option giving employees faster access to their pay, and integration with Branch
- Certification and License Management track employees' certifications, licenses, and vaccinations in the new certification management module
